Experience

Spinny

Aug 2025 – Present

SDE-1

Gurgaon, Haryana, India

- **Upgraded the frontend from React 17 to React 19**, improving overall website performance by an average of **11%** through better rendering efficiency and modern React features.
- Built a **car comparison feature** that enables users to compare multiple cars based on budget and key specifications, improving decision-making and increasing **test drive bookings and sales by 8%**.
- Introduced **early loan profiling** on the listing page to capture user financial intent earlier in the journey, resulting in a **4% increase in user profiling**.
- Introduced a **Buy Home Page** on the listing flow to surface personalized car recommendations based on user impression data and search history, improving relevance of listings and increasing successful conversions, resulting in a **4–5% uplift in sales**.
- **Implemented city-service mapping in the CMS**, automating service go-live across cities and eliminating manual configuration, significantly reducing operational effort and launch time.
- **Built a design system** using Razorpay Blade as the base, ensuring UI consistency across the platform and enabling seamless Figma-to-code integration through shared design tokens, reducing **feature delivery time by 18%**.

Internshala

Oct 2023 – Aug 2025

Associate Software Developer

Gurgaon, Haryana, India

- **Migrated legacy PHP pages to Next.js**, improving site performance by **15%**, reducing bugs by **41%**, and lowering maintenance time by **22%**.
- Developed a **WebSocket-based live chat system** for **IS Clubs** during YouTube events, which handles **1000+ users** simultaneously and ensures no delay in messaging.
- **Refactored job posting code** by removing redundant logic and breaking it into smaller, maintainable chunks, improving readability and maintainability.
- Designed and implemented a **custom image carousel** for **IS Clubs** with features like **image zoom, auto-scroll, and interactive navigation**, enhancing user engagement and visual appeal.
- **Optimized SQL queries**, enhancing database performance by **15–20%**, resulting in faster data retrieval and a noticeable reduction in server load.

Projects

Anime-watcher | *Next.js, Node.js, JWT Web-token, Mongo Db, Tailwind* | 🐙

- An anime streaming platform with features like episode streaming, login and signup functionality, and custom video player.
- Built using **Next.js** with **JWT authentication**, integrating **MongoDB** for user data storage. Tailwind CSS was used for styling.
- Used **Axios** for API data fetching, and Next.js app directory structure for **server-side rendering** and routing.

NewsDekho | *HTML, React.js, CSS, Bootstrap* | 🐙

- Developed a news application that displays India's top headlines, fetching real-time news from **NewsAPI**, serving **500+ daily users**.
- Built using **React.js** for the frontend and integrated **NewsAPI** for seamless fetching of news from various websites.

Technical Skills

Languages: Python, JavaScript, Typescript, HTML, CSS, jQuery, Git, LESS

Technologies/Frameworks/Libraries: Express.js, React.js, Next.js, Tailwind, Docker, GitHub, Redux

Operating Systems: Windows, Linux

Achievements

- Ranked **3rd** in the **Spinny Hackfest Competition**.
- Secured **top positions in various coding challenges and hackathons**, including HackerEarth and Codeforces.
- Solved over **300+** problems on LeetCode, enhancing problem-solving skills.

Education

Sitamarhi Institute Of Technology

August 2019 - Sep 2023

Bachelor of Technology in Computer Science & Engineering (CGPA of 8.24)

Bihar, India
